Mendocino College Water Line	713,452	50.00%
Total	<u>\$ 713,452</u>	
SEWER EXPANSION		
Expansion projects	-	
Total	<u>\$ -</u>	0.00%

Annual Report on Development Impact Fees, Per Government Code 66000
AB 1600 Statement
Description of Fees

The AB 1600 Development Fee is used only for the construction and the expansion of infrastructure to accommodate growth, not for operating or maintenance costs. Revenue will be used to maintain infrastructure standards for three capital types:

- Storm Drainage Impact
- Water Expansion
- Sewer Expansion

Storm Drainage Impact AB 1600 development fees are used to fund the design and construction of storm water drainage infrastructure improvements required to mitigate the impact of new development, specifically with the installation of impervious surfaces, such as parking lots, side walks, etc.

Water Expansion AB 1600 development fees are used to fund the design and construction of water supply, water treatment, and water distribution system infrastructure improvements required to mitigate the impact of new development.

Sewer Expansion AB 1600 development fees are used to fund the design and construction of wastewater treatment and collection infrastructure improvements required to mitigate the impact of new development.

Impact and Expansion Fee Schedule

Storm Drainage Impact	\$0.10 per square foot of new impervious surface (City Resolution # 1401 (84)).
Water Expansion	\$6,223 for a standard 3/4" meter with an escalating cost for larger meters (e.g. 1 1/2" meter = \$24,890).
Sewer Expansion	\$10,098 per unit in the sewer assessment district (CLMSD) South and \$7,456.42, per SFD, in CLMSD North.
